

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

MAGNETIC NEEDLE,

June, 1809.

Variation - - - $24^{\circ} 11'$.

PRESENTS

RECEIVED BY THE

ROYAL SOCIETY,

From November, 1809, to July, 1810;

WITH THE

NAMES OF THE DONORS.

1809.

PRESENTS.

- Nov.* 9. Pharmacopœia Collegii Regalis Medicorum Londinensis. Londini, 1809. 4°
Nouvelles Tables de Jupiter et de Saturne, par M. Bouvard. Paris, 1808. 4°
Mémoires de Physique et de Chimie de la Société d'Arcueil, Tome II. Paris, 1809. 8°
Reflexions sur quelques Méthodes minéralogiques, par M. Chenevix. Paris, 1808.
Fasciculus XVI. of a Synopsis of the British Conſervæ, by L. W. Dillwyn.
Earnest Contention for the true Faith, a Sermon by the Rev. Francis Wrangham, M. A. York, 1809. 4°
Supplement au Traité de Mécanique céleste, par l'Auteur, 4°
Bibliothèque Britannique, No. CCLXI—CCCII.
A System of Divinity in a Course of Sermons by the Rev. W. Davy. Lustleigh, 1795, 1807, 26 Vols. 8°
A Journal of Natural Philosophy, by W. Nicholson. No. CIII. to CVIII.
The Philosophical Magazine, by A. Tilloch. No. CXXXIV. to CXXXVIII.
Considerations on the Executive Government of the United States of America, by A. B. Woodward. Flatbush, 1809, 8°
The Critical Review. June—October, 1809.
16. A State of the Thermometer at Penzance in Cornwall, from Nov. 1, 1808, to May 31, 1809, by A. E. Stirling. MS. fol.

DONORS.

- The Royal College of Physicians.
Le Bureau des Longitudes de France.
The Society of Arcueil.
Richard Chenevix, Esq. F. R. S.
Lewis Weston Dillwyn, Esq. F. R. S.
The Reverend Francis Wrangham, M. A.
Comte Laplace, F. R. S.
Professor Pictet, F. R. S.
The Reverend William Davy, A. B.
Mr. William Nicholson.
Mr. Alexander Tilloch.
Augustus B. Woodward, Esq.
The Proprietor.
Maxwell Garthshore, M. D. F. R. S.

PRESENTS.

- A State of the Thermometer at Penzance in Cornwall, and at Glasgow in Scotland, from Dec. 25, 1808, to May 31, 1809. MS. fol.
- Tableau comparatif des Résultats de la Cristallographie et de l'Analyse chimique, relativement à la Classification des Minéraux, par l'Abbé Haüy. Paris, 1809. 8°
- Theorie de l'Origine des Montagnes, par B. G. Sage. Paris, 1809. 8°
- De la Nature et des Propriétés de huit Espèces d'Electricité, par B. G. Sage. Paris, 1809. 8°
- Des Mortiers ou Canons, par B. G. Sage. Paris, 1809. 8°
- Observations sur l'Emploi du Zinc, par B. G. Sage. Paris, 1809. 8°
23. Chart of the Coasts of Hindoostan and the Islands in the Indian Ocean, by J. Horsburgh.
- Dec. 7. A Treatise on plane and spherical Trigonometry, by R. Woodhouse. London, 1809. 8°
- Récherches sur le Système nerveux en général, et sur celui du Cerveau en particulier, par T. F. Gall, et G. Spurzheim. Paris, 1809. 4°
- The Philosophical Magazine, by A. Tilloch. No. CXXXIX.
- The Critical Review. November, 1809.
14. Archæologia, Vol. 16. Part I. London, 1809. 4°
- Plates XXI. XXII. and XXIII. of the Fourth Volume of Vetusta Monumenta.
- Some Account of the Cathedral Church of Gloucester. London, 1809. fol.
- Catalogue of the Library of the Royal Institution of Great Britain, by W. Harris. London, 1809. 8°
- Recueil d'Observations astronomiques, d'Opérations trigonometriques, et de Mésures barometriques faites par A. de Humboldt, et calculés par J. Oltmann. 1—4 Livraison.
- Conspectus Longitudinum et Latitudinum Geographicarum, ab A. de Humboldt, astronomice observatarum, Calculo subjecit J. Oltmann. Lutetiae 1808. 4°
- Essai politique sur le Royaume de la Nouvelle Espagne, par A. de Humboldt. 1—3 Livraison.
- Plantes Equinoxiales, par A. de Humboldt et A. Bonpland, Tome I. Paris, 1808. fol.
- Monographies des Melastoma, et autres Genres du même Ordre, par A. Bonpland. 1—8 Livraison.

DONORS.

Maxwell Garthshore,
M. D. F. R. S.

M. l'Abbé Haüy de
l'Institut de France.

M. Sage de l'Institut
de France.

James Horsburgh, Esq.
F. R. S.
Robert Woodhouse, Esq.
F. R. S.
F. T. Gall, M. D.

Mr. Alexander Tilloch.
The Proprietor.
The Society of Antiquaries.

The Managers of the
Royal Institution.

Baron de Humboldt.

PRESENTS.

DONORS.

- 1810.
- Jan. 11.* Transactions of the Society for the Encouragement of Arts, Manufactures, and Commerce. Vols. XXIV, XXV, and XXVI. London, 1806—1808. 8°
 A Journal of Natural Philosophy, by W. Nicholson. No CIX. to CXI.
 The Philosophical Magazine, by A. Tilloch. No. CXL.
 The Critical Review. December, 1809.
 18. The Hindu Pantheon, by E. Moor. London, 1810. 4°
 25. Oratio Harveiana, a G. Heberden. London, 1810. 4°
- Feb. 1.* The History of China, in Chinese, 5 Vols.
 The Philosophical Magazine, by A. Tilloch. No. CXLI.
 The Critical Review. January, 1810,
 Prospetto dei Minerali di Sicilia. Palermo, 1808. 8°
 8. An Examination of M. la Place's Theory of capillary Action. London, 1809. 8°
 A Journal of Natural Philosophy, by W. Nicholson. No. CXII.
 15. Remains of Arabic in the Spanish and Portuguese Languages, by S. Weston. London, 1810. 8°
 The Doctrine of Life-annuities and Assurances, analytically investigated and explained, by F. Baily. London, 1810. 8°
 22. Engravings and Etchings of the principal Statues, Busts, Bass-reliefs, sepulchral Monuments, cinerary Urns, &c. in the Collection of H. Blundell, Esq. at Juce, 1809, 2 Vols. fol.
- March 1.* Connaissance des Temps pour l'An 1811, publiée par le Bureau des Longitudes. Paris, 1809. 8°
 Magna Britannia, by D. Lysons and S. Lysons, Vol. II. Part II. London, 1810. 4°
 The Philosophical Magazine, by A. Tilloch. No. CXLII.
 Philosophie zoologique, par J. P. B. A. Lamarck. Paris, 1809. Tomes II. 8°
 8. Transactions of the Linnæan Society of London, Vol. X. Part I. London, 1810. 4°
 Transactions of the Society for the Encouragement of Arts, Manufactures, and Commerce. Vol. XXVII. London, 1809. 8°
 Caledonia, by G. Chalmers. Vol. II. London, 1810. 4°
- The Society for the Encouragement of Arts, Manufactures, and Commerce.
 Mr. William Nicholson.
 Mr. Alexander Tilloch.
 The Proprietor.
 Major Moor, F. R. S.
 William Heberden, M.D. F. R. S.
 Mr. Morrison.
 Mr. Alexander Tilloch.
 The Proprietor.
 Sig. Giuseppe Emanuele Ortolani.
 The Author.
 Mr. William Nicholson.
 The Rev. Stephen Weston, B. D. F. R. S.
 Mr. Francis Baily.
 Henry Blundell, Esq.
 Le Bureau des Longitudes de France.
 The Rev. Daniel Lysons, A. M. F. R. S. and Sam. Lysons, F. R. S.
 Mr. Alexander Tilloch.
 M. Lamarck, of the Institute of France.
 The Linnæan Society of London.
 The Society for the Encouragement of Arts, Manufactures, and Commerce.
 George Chalmers, Esq. F. R. S.

PRESENTS.

- A Letter to H. Cline, Esq. on imperfect Developements of the Faculties, and on the Treatment of Impediments of Speech, by J. Thelwall. London, 1810. 8°
- A Journal of Natural Philosophy, by W. Nicholson. No. CXIII.
- The Critical Review. February, 1810.
15. An elementary Treatise on Geology, by J. A. de Luc. London, 1809. 8°
- Some Account of the Siren Lacertuna, and other Species of the same Genus of amphibious Animals. 8°
22. Précis des Mémoires de B. G. Sage, lus dans les Séances de la première Classe de l'Institut pendant l'Année 1809. Paris, 1809. 8°
- Expériences sur les Mortiers, par B. G. Sage. Paris, 1809. 8°
- Expérience qui fait connaître que la Chaux éteinte par immersion peut être régénérée en Pierre calcaire par le seul Concours de l'Eau, par B. G. Sage. Paris, 1810. 8°
- April 5. A Journal of Natural Philosophy, by W. Nicholson. No. CXIV.
- The Philosophical Magazine, by A. Tilloch. No. CXLIII.
- The Critical Review. March, 1810.
- May 5. A Journal of Natural Philosophy, by W. Nicholson. No. CXV. and CXVI.
- The chemical Catechism, by S. Parkes. Fourth Edition. London, 1810. 8°
- The Philosophical Magazine, by A. Tilloch. No. CXLIV.
- The Critical Review. April, 1810.
17. Des Effets de la Religion de Mahommed sur l'Esprit, les Mœurs, et Gouvernement des Peuples, chez lesquelles cette Religion s'est établie, par M. Oelsner. Paris, 1810. 8°
- Dissertation sur les Effets d'un Poison de Java, appelé Upar trinté, par A. Raffeneau Delile. Paris, 1809. 4°
31. Tentamen de Metris ab Æschylo in choricis Cantibus adhibit. Cantabrigiæ, 1809. 8°
- Dissertatio inauguralis de iis quæ veteres Philosophi de Magnitudine Telluris memorie prodiderunt. Lugd. Bat. 1808. 4°
- June 7. A Topographical Dictionary of Ireland, by N. Carlisle. London, 1810. 4°
- A Journal of Natural Philosophy, by W. Nicholson. No. CXVII.
- The Philosophical Magazine, by A. Tilloch. No. CXLV.
- The Critical Review. May, 1810.

DONORS.

- John Thelwall, Esq.
- Mr. William Nicholson.
- The Proprietor.
- John Andrew de Luc, Esq. F. R. S.
- Professor Barton of Philadelphia.
- M. Sage, de l'Institut de France.
-
- Mr. William Nicholson.
- Mr. Alexander Tilloch.
- The Proprietor.
- Mr. William Nicholson.
- Mr. Samuel Parkes.
- Mr. Alexander Tilloch.
- The Proprietor.
- M. Oelsner.
- Alire Raffeneau Delile, M. D.
- The Rev. Charles Burney, LL. D. F. R. S.
- John Christopher Low, A. M.
- Nicholas Carlisle, Esq.
- Mr. William Nicholson.
- Mr. Alexander Tilloch.
- The Proprietor.

PRESENTS.

21. Observations on the Principles which regulate the Course of Exchange, by W. Blake. London, 1810. 8°
28. An Index to the first three Volumes of Vetusta Monumenta. London, 1810. fol.
- Transactions of the American Philosophical Society, held at Philadelphia, Vol. VI. Part II. Philadelphia, 1809. 4°
- July* 5. Principe organique de l'Univers, par G. Delamardelle, Tome II. Paris, 1809. 8°
- A Journal of Natural Philosophy, by W. Nicholson. No. CXVIII.
- The Philosophical Magazine, by A. Tilloch. No. CXI. VI.
- The Critical Review. June, 1810.

DONORS.

W. Blake, Esq. F. R. S.

The Society of Antiquaries.

The American Philosophical Society.

M. Delamardelle.

Mr. William Nicholson.

Mr. Alexander Tilloch.

The Proprietor.

INDEX

TO THE

PHILOSOPHICAL TRANSACTIONS

FOR THE YEAR 1810.

A	page
<i>Acid, muriatic</i> , its composition, - - -	243
— <i>oxymuriatic</i> , researches on its nature and combinations,	231
— does not form water with ammonia,	235
— no proofs that it contains oxygene, -	240
— a simple body, and a peculiar acidifying principle,	243
— its name improper, - - -	244
— attracted by the positive surface, in Voltaic combinations,	250
AFZELIUS, DR. His discovery of the luminous property in the Pausus Spheroцерus, noticed, - -	279
<i>Alkalies, fixed</i> . Some new experiments on the metals from,	16
<i>Ammonia, its decomposition</i> , by the metals of the fixed alkalies,	20
— by alloys of tellurium and potassium, and arsenic and potassium, - -	32
— by Voltaic and common electricity,	52
— its production from pure potash, charcoal and water, - - -	43
— <i>amalgam from</i> , experiments to obtain it in a dry state,	55

B

BAJON, M. His observations during the migration of the dorados, noticed, - - -	259
BANKS, SIR JOSEPH. His observations on the luminous quality of the cancer fulgens, and the pellucens, noticed,	262
<i>Barytes</i> , its composition, - - -	63
BERTHOLLET, M. His statement of the composition of fused potash, mentioned, - - -	34
— His experiments on the oxymuriatic acid, referred to, - - -	231

INDEX.

	<i>page</i>
BERTHOLLET, M. His views of this substance not correct,	237
BERZELIUS, M. His analysis of cast iron noticed,	64
BIOT, M. His experiments with a prism, noticed,	198
<i>Bows, prismatic</i> , Considerations proving that there are two primary ones, a blue, and a red one,	151
----- Illustrations of the dependance of the streaks of both, upon the critical separation,	154
BRANDE, Mr. WILLIAM T. His observations on the effects of magnesia, in preventing an increased formation of uric acid ; with some remarks on the composition of the urine,	136
----- His experiments on the jelly, found in the oviduct of the frog, and oviviviparous shark,	217
BRINKLEY, REV. DR. JOHN. Extract of a letter from, on the annual parallax of α <i>Lyra</i> ,	204

C

<i>Calculus, urinary</i> , on a new species of,	223
CARRADORI. His experiment upon the lucciola (<i>lampyris italica</i>) noticed,	283
CAVENDISH, HENRY, Esq. His experiments on the defla- gration of mixtures of oxygene, hydrogene, and nitrogene, noticed,	40
<i>Coloured concentric rings</i> . Supplement to the first and second part of the paper of experiments, for investigating the cause of, between object glasses, and other appearances of a similar nature,	149
<i>Colours</i> , remarks on those supposed to be produced by thin plates, or wedges of air,	159
<i>Compound</i> , a singular one, obtained by combining oxymuriatic acid, phosphorus, and ammonia,	233
CRUICKSHANK, MR. His experiments on oxymuriatic acid and hydrogene noticed,	235
CURADAU, M. His opinion of the composition of the bases of the fixed alkalies, controverted,	17

D

DALTON, MR. JOHN. His idea of the composition of the protoxides and neutral salts mentioned,	63
----- His ideas of definite proportions no- ticed,	254
D'ARGET, M. His experiments on potash and soda, men- tioned,	34
DAVY, HUMPHRY, Esq. His Bakerian lecture. On some	

INDEX.

	<i>page</i>
new electrochemical researches, on various objects, particularly the metallic bodies from the alkalies and earths, and on some combinations of hydrogene, -	16
DAVY, HUMPHRY, ESQ. his experiments on the fusible substance obtained by heating potassium in ammonia, -	20
-----, his experiments on the fusible substance, obtained by heating sodium in ammonia, -	24
-----, his experiments on nitrogene, ammonia, and the amalgam from ammonia -	37
-----, his suggestions on the mode of aeration of the ova of fish, - -	213
-----, his researches on the oxymuriatic acid, its nature and combinations ; and on the elements of the muriatic acid. With some experiments on sulphur and phosphorus, - -	231
DAVY, MR. JOHN, his experiments on muriatic acid gas, noticed, - - -	237
<i>Dog-fish</i> , on its organization, - - -	205

E.

<i>Earths</i> , on the metals of, - -	58
<i>Elater noctilucus</i> , its organization for the production of light, -	277
<i>Elater ignitus</i> , its organization for the production of light, -	278

F.

<i>Fish</i> , on their modes of depositing their ova -	213
<i>Fetus</i> , description of an extraordinary one, -	123
-----, on the aeration of its blood, - -	216

G.

GIBSON, MR. BENJAMIN, his description of an extraordinary human foetus, - - -	123
<i>Glow worms</i> , experiments on their luminous matter, -	283
<i>Goose</i> , on the gizzard of, - -	187
<i>Grazing birds</i> , on the gizzards of, - -	184
GROOMBRIDGE, S. ESQ. his observations on atmospherical refraction, as it affects astronomical observations, -	190

H.

HENRY, DR. WM. his analysis of several varieties of British and foreign salt, (muriate of soda), with a view to explain their fitness for different economical purposes, -	89
--	----

INDEX.

	<i>page</i>
HENRY, DR. WM. his experiments on muriatic acid gas, referred to,	231
HERSCHELL, DR. his supplement to the first and second part of the paper of experiments, for investigating the cause of coloured concentric rings, between object glasses, and other appearances of a similar nature,	149
HOME, EVERARD, ESQ. on the case of a man who died in consequence of the bite of a rattle-snake, with an account of the effects produced by the poison,	75
—————, on the gizzards of grazing birds,	184
—————, on the mode of breeding of the oviviparous shark, and on the aeration of the foetal blood in different classes of animals,	205
HORSBURG, CAPTAIN, his observations on the causes of the luminous appearances of the sea, mentioned,	263
HULME, DR. his experiments on the luminous appearances of dead animals, noticed,	282
<i>Hyperoxymuriatic acid</i> , attempts to obtain it,	241
—————, no proofs of its existence,	242

J.

<i>Jelly</i> , on the chemical nature of that surrounding the ova of frogs and fishes,	217
<i>Jelly</i> , star shot, on its nature,	212
<i>Journal</i> , Meteorological, for 1809, kept at the apartments of the Royal Society,	ii

K.

KIRWAN, DR. His experiment on nitrous gas and sulphuretted hydrogen, mentioned,	45
KNIGHT, T. A. ESQ. on the parts of trees primarily impaired by age,	178

L.

<i>Lamprides</i> , its organization for the production of light,	275
LANGSTAFF, MR. His observations on the milky appearance of the sea, mentioned,	269
<i>Lecture</i> , Croonian,	1
———— Bakerian,	16
<i>Lime</i> , its composition,	63
———— its effects on the urine,	145
<i>Luminous Animals</i> , observations upon,	258

INDEX.

	<i>page</i>
LUSSAG, GAY, and THENARD, their opinion concerning the metals of the fixed alkalies, mentioned, -	17
----- their reasonings concerning the nature of the fusible substance obtained by heating potassium in ammonia, - - - - -	18
----- their opinions controverted on their own statements, - - - - -	19
----- their experiments on muriatic and oxymuriatic acids referred to, -	232, 235, 237

M.

MAGARTNEY, J. Esq. his observations upon luminous animals,	258
<i>Magnesia</i> , its composition, - - - - -	63
----- observations on its effects, in preventing an increased formation of uric acid, - - - - -	136
----- its effects on the urine, - - - - -	144
MUDGE, LIEUT. COL. his astronomical observations made at the Royal Observatory, noticed, - - - - -	194
<i>Muscular Action</i> , on the duration of. - - - - -	2

N.

NEWTON, SIR ISAAC, his explanation of the blue and red bows, referred to, - - - - -	150
<i>Nitrogene</i> , attempts to decompose it, - - - - -	47

O.

<i>Oxide, Cystic</i> , the name given to a new species of urinary calculus, - - - - -	223
--	-----

P.

PEARSON, DR. his observations and experiments on pus,	294
<i>Parallax</i> , annual of α <i>Lyrae</i> , - - - - -	204
PIAZZI, M. his table of mean refractions, noticed, - - - - -	195
<i>Pholas dactylus</i> , its luminous fluid, - - - - -	280
<i>Phosphorus</i> , experiments on, - - - - -	253
----- no oxygene evolved from it, by the agency of oxymuriatic acid gas, - - - - -	257
PLINY, his observations of the luminous fluid in the <i>pholas</i> <i>dactylus</i> , noticed, - - - - -	280
<i>Potash</i> , its decomposition, by oxide of tellurium and charcoal	29
<i>Potash, muriate of</i> , its composition, - - - - -	36
<i>Presents</i> , a list of those made to the Royal Society, from November 1809 to July 1810,	319

INDEX.

	<i>page</i>
PRIESTLY, Dr. his experiments on the production of nitro- gene, during the freezing of water, noticed, - -	44
<i>Pus</i> , observations and experiments on, - - -	294
— agency of caloric on, - - -	297
— agency of water on, - - -	300
— agency of alcohol of wine on, - - -	303
— to distinguish it from mucus, - - -	304

R.

<i>Rattle-snake</i> , on the case of a man who died in consequence of its bite, - - -	75
<i>Rays</i> , of the manner in which those that are separated by critical reflection or intromission come to the eye, -	169
REAUMUR, his observations on the luminous fluid, in the <i>pholas dactylus</i> , referred to, - - -	280
<i>Refractions</i> , the mean astronomical, according to several authors, - - -	203
<i>Riding</i> , on its salutary effects, - - -	11
<i>Rings</i> , seen in a prism, illustration of their dependence upon the critical separation, - - -	157
RITTER, M. his opinion of the nature of the bases of the fixed alkalies, confuted, - - -	17
— his experiments on tellurium, mentioned -	27
RIVILLE, his discovery of an animal which shed a blue lumi- nous liquor, referred to - - -	281

S.

<i>Salt</i> , methods of making different varieties of, -	91
—, impurities in, - - -	97
—, <i>British</i> large grained, equal to foreign bay salt, -	108
—, and foreign, a comparison of their component parts, - - -	97
SCHEELE, his views of the oxyinuriatic and muriatic acids, correct, - - -	237
<i>Scolopendro electrica</i> , its luminous fluid, -	280
<i>Sea</i> , light of, always produced by living animals, -	290
<i>Sea Sickness</i> , on its causes, - - -	6
<i>Shark</i> , the oviviviparous, on its mode of breeding, -	205
<i>Silex</i> , metal of, in cast iron, - - -	64
—, hardens copper, - - -	66
<i>Soda</i> , muriate of, methods of analysing its several varieties, -	108
—, new views of its decomposition, - - -	247

INDEX.

	<i>page</i>
<i>Soda and subcarbonate of</i> , their effects on the urine,	143
SPALLANZANI, his examination of a medusa, referred to,	281
<i>Strontites</i> , its composition,	63
<i>Sulphur</i> , experiments on,	251
———, no oxygene evolved from it, by the agency of oxy- muriatic acid gas,	257
<i>Surfaces in contact</i> , which modify the form of prismatic appearances. Experiments on the multiplying power of,	164
<i>Swan</i> , on its gizzard,	187

T.

<i>Telluretted hydrogen</i> , the name given to a combination of tellurium and hydrogen,	28
<i>Theory</i> , some considerations of, illustrated by new facts,	67
THOMSON, DR. his experiments on sulphur, noticed,	251
<i>Trees</i> , on the parts of, primarily impaired by age,	178
<i>Turkey</i> , on the gizzard of,	187

U.

<i>Urine</i> , its nature in birds,	229
———, how affected by changes in diet,	230

W.

WOLLASTON, DR. his Croonian Lecture, on the duration of muscular action,	2
———, on cystic oxide, a new species of urinary calculus,	223
